

Release notes - docuteam curator

Curator release notes are split into three categories: new features, improvements and bugfixes. The links point to the descriptions and discussions of the issues directly. Please note that you have access only from inside our network.

Version 5.2.4

[Version 5.2.4](#), released: 14/February/22

This bugfix release primarily improves the stability of the database connection.

Bugs

- [CURATOR-556](#) - hibernate initialization problems
- [CURATOR-610](#) - location management windows correctly shows linked cases, when a location has been selected in mode „view“
- upgrade dependencies according to PRs from snyk.io

Version 5.2.3

[Version 5.2.3](#), released: 20/January/22

This bugfix release updates critical libraries.

Bugs

- upgrade dependencies according to PRs from snyk (e.g. log4j to 2.17.1)

Version 5.2.2

[Version 5.2.2](#), released: 05/January/22

This bugfix release addresses an issue regarding the database connection.

Bugs

- [CURATOR-608](#) - use correct hibernate persistence provider

Version 5.2.1

[Version 5.2.1](#), released: 05/January/22

This bugfix release addresses an issue that caused warnings regarding the database connections.

Improvements

- updated Swedish translations

Bugs

- [CURATOR-607](#) - curator shows a warning regarding deprecated MySQL driver class when opening a database
- upgrade dependencies according to PRs from snyk

Version 5.2.0

[Version 5.2.0](#), released: 22/December/21

This minor release adds support for MySQL 8, improves reports and fixes critical security issues in libraries.

New Feature

- [CURATOR-309](#) - additional reports (landscape) to give more space to reference codes.

Improvements

- [CURATOR-597](#) - support MySQL version 8
- [CURATOR-581](#) - improve performance with large number of files/locations

Bug

- [CURATOR-580](#) - fix PDF report (WithLocations) at search after case, when an AU has several files, each file in another case
- [CURATOR-596](#) - update mysql jdbc driver to work with java 11
- [CURATOR-599](#) - upgrade dependencies according to PRs from snyk
- [CURATOR-605](#) - update log4j to version 2.17.0 (CVE-2021-45105, CVE-2021-45046, CVE-2021-44228)

Version 5.1.1

[Version 5.1.1](#), released: 20/December/19

This bugfix release addresses a few issues to improve the stability of the database connection.

Improvements

- [CURATOR-581](#) - improve performance with large number of files/locations

Bugs

- [CURATOR-579](#) - avoid org.hibernate.LazyInitializationException at AU selection change.
- [CURATOR-578](#) - fix error at move AU just after title changed

Version 5.1.0

[Version 5.1.0](#), released: 27/May/19

This is a release for mainly two new features: limiting a search to a certain branch of the archival tree structure, and to be able to link archival units directly to locations. Plus the usual bugfixes.

New Features

- [CURATOR-380](#) - new filter to limit search to a subtree of the inventory

Improvements

- [CURATOR-297](#) - extend GUI to support linking files directly to a location
- [CURATOR-413](#) - extend GUI to update tree context filter based on current node in MainView

Bugs

- [CURATOR-510](#) - fix search for dates to include the entire upper limit year
- [CURATOR-563](#) - close EAD import confirmation dialog only after tree has been reloaded
- [CURATOR-570](#) - support redirecting log messages to console appender into SystemOutView

Version 5.0.3

[Version 5.0.3](#), released: 17/April/19

Bugs

- [CURATOR-388](#) - fix bug in report
- [CURATOR-565](#) - fix bug with empty reports

Version 5.0.2

[Version 5.0.2](#), released: 11/Jan/19

Bugs

- [CURATOR-553](#) - support tags with quotes

Version 5.0.1

[Version 5.0.1](#), released: 10/Jan/19

Bugs

- [CURATOR-552](#) - enable case insensitive tag selection

Version 5.0.0

[Version 5.0.0](#), released: 21/Dec/18

New Features

- [CURATOR-463](#) - integrate tag functionality to main develop branch
- [CURATOR-409](#) - adapt curator for authentication with Active Directory
- [CURATOR-482](#) - add MySQL support for server database

Improvements

- [CURATOR-527](#) - add missing features in database selection field for Active Directory
- [CURATOR-533](#) - show database server in title bar when using Active Directory
- [CURATOR-538](#) - check if curator-server is available before setting up connection
- [CURATOR-539](#) - ignore ldap-group-blacklist.xml
- [CURATOR-544](#) - introduce error message when closing window before process finished
- [CURATOR-302](#) - adjust label in search view
- [CURATOR-421](#) - save user information is stored within the user's profile, not the application
- [CURATOR-445](#) - keep tree position when reload button is clicked
- [CURATOR-446](#), [CURATOR-472](#) - improve performance of taxonomy handling and taxonomy window
- [CURATOR-484](#) - improve tool tips for taxonomy buttons
- [CURATOR-507](#) - refine category filter buttons
- [CURATOR-513](#) - fix GUI translations
- [CURATOR-532](#) - enable case insensitive search search in taxonomy module

- [CURATOR-494](#) - mavenize curator-server
- [CURATOR-495](#) - increase field size of digital object base url for institution
- [CURATOR-497](#) - improve logging
- [CURATOR-500](#) - improve creation of distribution

Bugs

- [CURATOR-464](#), [CURATOR-503](#), [CURATOR-504](#), [CURATOR-505](#), [CURATOR-514](#), [CURATOR-515](#), [CURATOR-518](#) - fix bugs related to tags and tag management
- [CURATOR-401](#) - fix report header with new filters but old search result
- [CURATOR-512](#) - fix error with closing dialog „Set closure period for subelements“ while operation was still ongoing
- [CURATOR-520](#), [CURATOR-525](#) - fix problems with taxonomy view
- [CURATOR-524](#) - fix bug with changing archival unit type
- [CURATOR-526](#) - fix bug with entering text for archival units of type „Map“ or „Image“
- [CURATOR-528](#) - fix bug with calculation of the creation period from subelements
- [CURATOR-529](#) - fix bug with date values which were not immediately displayed in the tree
- [CURATOR-537](#) - fix filter clearing when jumping from an archival unit to a taxonomy entry

Version 4.0.0

[Version 4.0.0](#), 08/Aug/18

New Features

- [CURATOR-351](#) - add taxonomy module for subject and geographical terms
- [CURATOR-352](#) - add information types „Map“ and „Image“

Improvements

- [CURATOR-441](#) - add Java version to exception window
- [CURATOR-443](#) - display relations with same label in both directions only once in dropdown
- [CURATOR-454](#) - show warning when information type is changed and there is data specific to the type (image or map) that would get lost
- [CURATOR-455](#) - adapt label for „Hide field 3.1 on publication“

Bugs

- [CURATOR-384](#) - improve performance for deletion of an archival unit
- [CURATOR-390](#) - fix bug with returning from another application
- [CURATOR-402](#) - fix bug with reloading the tree structure
- [CURATOR-405](#) - fix bug with sorting archival units with children
- [CURATOR-410](#), [CURATOR-411](#), [CURATOR-412](#), [CURATOR-415](#), [CURATOR-447](#), [CURATOR-448](#), [CURATOR-452](#), [CURATOR-456](#), [CURATOR-460](#), [CURATOR-473](#) - fix GUI issues in taxonomy view
- [CURATOR-418](#) - fix bug with newline characters in export and import functions

- [CURATOR-422](#) - fix bug with copying an archival unit
- [CURATOR-425](#) - fix bug in assigning a case to an archival unit
- [CURATOR-427](#) - fix error in „Importstruktur AG-2014“
- [CURATOR-474](#) - fix tooltip in location management
- [CURATOR-477](#) - fix bug with saving reports on macOS
